PROFESSIONAL SUMMARY

Artificial Intelligence undergraduate focused on Machine Learning, Deep Learning, Natural Language Processing, Data Science, and cloud-based applications. Experienced in developing project-based solutions using Python, including predictive modeling, sentiment analysis, RAG applications, exploratory data analysis, and Streamlit-based deployment.

EDUCATION

Bachelor of Artificial Intelligence

2023 – Present

University of Management and Technology (UMT), Sialkot

Relevant Coursework: Machine Learning, Deep Learning, Natural Language Processing, Data Science, Data Structures & Algorithms

TECHNICAL SKILLS

Programming

Python SQL

Deep Learning

Deep Learning TensorFlow Artificial Neural Networks

Data Science

Pandas NumPy Matplotlib Seaborn Data Analysis

Machine Learning

Machine Learning Scikit-learn Predictive Modeling

NLP

NLP NLTK Hugging Face Transformers RAG

Tools & Deployment

Jupyter Git GitHub Streamlit AWS

SELECTED PROJECTS

Customer Churn Prediction

[GitHub](#) [Live Demo](#)

Python • Pandas • NumPy • Scikit-learn • Joblib • Streamlit

- Developed a machine learning application to estimate customer churn likelihood from customer, service, contract, and billing information.
- Built and deployed the prediction application using Scikit-learn, Joblib, and Streamlit.

Sentiment Analysis System

[GitHub](#) [Live Demo](#)

Python • Scikit-learn • TF-IDF • NLP • Streamlit

- Developed a three-class sentiment analysis system for social media text using NLP preprocessing and TF-IDF feature extraction.
- Compared Logistic Regression and Multinomial Naive Bayes, selecting Logistic Regression based on validation performance.
- Deployed the trained model with Streamlit for real-time sentiment prediction.

E-commerce Sales & Profitability Analysis

[GitHub](#)

Python • Pandas • NumPy • Matplotlib • Seaborn

- Performed data cleaning, feature engineering, and exploratory analysis on transaction-level e-commerce data.
- Analyzed sales trends, product performance, customer behavior, regional performance, and profitability.
- Created analytical visualizations using Pandas, NumPy, Matplotlib, and Seaborn to identify business patterns.

AgroFarm AI

[GitHub](#) [Live Demo](#)

Python • Gemini • ChromaDB • RAG • Streamlit

- Developed an agriculture advisory application combining Generative AI, RAG, and Agentic AI for grounded, field-aware farming guidance.
- Integrated Gemini, ChromaDB, TF-IDF, Open-Meteo, and Streamlit into the application.

LANGUAGES

English • Urdu • Punjabi
